Net Debt / EBITDA	0.42x	0.65x	Improved

Astrazenix Software Services Limited delivered strong financial performance during FY2026. Consolidated revenue increased from **₹58,420 crore to ₹64,850 crore**, representing **11.0% year-over-year (YoY) revenue growth**, driven by higher cloud transformation projects, cybersecurity consulting, and AI platform implementation across North America and Europe.

Operating profitability improved as automation initiatives reduced delivery costs and utilization increased. Management expects revenue growth between **10%–12%** during FY2027.

The top five enterprise customers contributed **51% of total revenue**, increasing dependency on a limited customer base.

Trade receivables increased **27% YoY**, significantly exceeding revenue growth of **11%**, indicating slower customer collections.

The company is investigating a cybersecurity incident affecting one overseas development center. No material financial impact has yet been recognized.

Voluntary attrition increased from **14.1% to 20.6%**, primarily among AI engineers and cloud architects.

Income tax and GST disputes totaling **₹980 crore** remain under litigation before appellate authorities.

Goodwill of **₹3,950 crore** is supported by a recoverable value exceeding carrying value by only **₹210 crore**, creating moderate impairment risk.

Although operating margin improved during FY2026, management expects wage inflation and higher subcontracting costs to pressure profitability in FY2027.

Approximately **68% of revenue** is denominated in foreign currencies, exposing earnings to exchange-rate volatility.

Capital expenditure increased by **39%** during FY2026 because of new AI infrastructure investments, reducing short-term free cash flow flexibility.

One European subsidiary is undergoing a GDPR compliance review, and potential penalties cannot currently be estimated.

Financial Year Revenue (₹ crore) Revenue Growth (YoY)

FY2022	42,180	—
FY2023	47,860	13.5%
FY2024	53,780	12.4%
FY2025	58,420	8.6%
FY2026	64,850	11.0%
